SUMMARY

Proficient Full Stack Developer with experience in building responsive web applications using modern technologies like HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB. Skilled in designing RESTful APIs, managing databases, and deploying scalable solutions. Capable of handling end-to-end project development — from front-end UI/UX to back-end logic and deployment. Strong understanding of version control (Git), debugging, and agile development practices.

PROJECTS

Nxt Trendz – Developed an e-commerce web app using React with user login, product listing, search, sort, and filter features.
Live   Username - rahul | Password-rahul@2021

Jobby App – A job search platform with login authentication, job listings, and filtering options. Built using React and REST APIs.
Live   Username - rahul | Password-rahul@2021

Nxt Watch – Video streaming web app with login, category-wise videos, and light/dark mode using React and JWT auth.
Live   Username - rahul | Password-rahul@2021

E-Library System. Developed a digital library allowing users to sign up, log in, and download PDF notes and books using HTML,CSS, Django and MySQL.

AI Chatbot Application. Created a GPT-like chatbot using Gemini's API key, with Node.js and Express for the backend and HTML/CSS for the frontend.
